Platforms: Dynamics 365, Power Platform, Power BI, SharePoint Online **Automation:** Power Automate, Canvas Apps, Copilot Studio
Cloud: Azure Functions, Azure AI Foundry, REST APIs **Dev:** C# (.NET), JavaScript, SQL

PROFESSIONAL SUMMARY

D365 Engineer delivering enterprise solutions on Dynamics 365 and Power Platform for major Greek and international organisations. Proven across custom CRM development, AI-powered document processing, Canvas App delivery, SharePoint migrations, and end-to-end process automation, with 20+ flows and apps delivered across multiple enterprise clients. Microsoft certified across Azure and Power Platform.

EDUCATION

BSc Applied Informatics · University of Macedonia

Sep 2024

Thessaloniki, Greece

- Specialised in database design, software engineering, and information systems, building a strong foundation in applied computing and enterprise architecture.

WORK EXPERIENCE

D365 Engineer · OTE S.A. — Deutsche Telekom Group

Oct 2024 – Present

Athens, Greece

- Designed and delivered custom **Dynamics 365** CRM systems and model-driven apps covering purchase requisitions, invoicing, bookings, cost centres, and expense management across multiple enterprise clients, **reducing process handling time by ~40%**.
- Co-built **DoRe**, an AI invoice processing tool using **Azure Document Intelligence** and a custom **C# .NET plugin**: a **Power Automate** flow auto-detects incoming PDF invoices via email, extracts all fields using AI, and routes for approval, **eliminating manual data entry and cutting invoice processing time by ~70%**.
- Developed 20+ **Power Automate** flows and **Canvas Apps** across clients, including an event management app, an IT ticketing system triggered by email, and a suite of 6 SMB-focused apps, **automating approval chains, notifications, and manual tasks end-to-end**.
- Built **Canvas Apps** backed by **SharePoint Online** with role-based security for granular data visibility per user group; migrated on-premises **SharePoint** environments to **SharePoint Online**, **modernising document infrastructure and reducing access friction across organisations**.
- Developed custom **C# .NET plugins** to extend Dynamics 365 with complex business logic; applied **JavaScript** for dynamic UI rules and field visibility; delivered **Power BI** dashboards giving management real-time operational and financial visibility across platforms.
- Participated in architecture, environment governance, and deployment sessions for multi-org **Dynamics 365** tenants using **Azure AI Foundry** and **Copilot Studio**, ensuring scalable, maintainable solution design across all client engagements.

Logistics Manager · **Head Waiter** · TGI Fridays

Nov 2019 – Oct 2021

Thessaloniki, Greece

- Managed inventory, compliance, and shift operations for a 700+ daily customer venue across two progressive roles; trained new staff and resolved escalations under pressure.

Business Development & Communication Associate · Eduk8

Sep 2019 – Oct 2019

Thessaloniki, Greece

- Presented educational robotics products at the Balkans' largest education exhibition and gave interviews on national TV; assessed client needs and identified commercial opportunities.

CLIENTS

International Airport of Heraklion Crete (IAHC) · TERNA Group · Flexopack · Stavros Niarchos Foundation · ESA Security · ECHA (European Chemicals Agency) · SteriMed
